

BRECOprotect® - timing belts

Corrosion-resistant. FDA-compliant. Blue.

BRECOprotect®:

- The perfect choice for strict requirements associated with contact with food
- Groove-free design guarantees easy cleaning
- Corrosion-protection for the steel tension carriers
- Available by the meter or as continuous, welded products
- A different kind of belt with a colour scheme in line with current food industry trends

BRECOprotect®

Our BRECOprotect® range of timing belts includes steel tension carriers that are fully embedded in polyurethane, which protects them from corrosion. The material chosen for the timing belts is compliant with FDA regulations and coloured blue in line with current trends and requirements in the food processing industry.

The groove-free design of the BRECOprotect® timing belts prevents hidden and difficult-to-remove contamination and makes the cleaning process easier. In addition, BRECOprotect® timing belts are also suited to applications in moist environments, where the effects of hydrolysis can cause conventional timing belts to fail.

BRECO is member of Mulco Europe EWIV

BRECOprotect® - Corrosion-resistant. FDA-compliant. Blue.

BRECOprotect® timing belts are available in widths from 25 to 100 mm. The timing belts AT10, AT15, AT20 and T10 as well as the flat belt type F3 in width of 50mm are available, either with fixed belt lengths or in welded designs. The timing belt in width T10 is also available with aramid tension members.

All of the relevant technical details about BRECOprotect® and its wide-ranging applications can be obtained from your BRECO sales partner:
